

## Part 1: Technical Skills Assessment

### Technical Skills Assessment

In this task, you will create a ride booking screen for the MOOVTEK app.

The screen should replicate the provided design, including the following features:

1. A header for top navigation bar.
2. Input fields for 'Pickup Location' and 'Dropoff Location'.
3. A map view displaying the current location with a marker.
4. Two ride type options at the bottom ('MOOVTEK - CAR' and 'MOOVTEK - BIKE') in a scroll list.

Below is the visual design you need to implement:

Instructions:

1. Use React Native and Expo CLI to create this screen.
2. Ensure the design is responsive and works on different screen sizes.
3. You have 55 minutes to complete this task.
4. You can use any third-party libraries if needed, but discuss your choices and reasoning while doing the test.
5. You can clone the repositories from the following link to get the set-up project:

<https://github.com/moovtek/mobile-onsite-test.git>
